

AMENDMENTS TO THE SPECIFICATION

Please amend page 3, first full paragraph, as follows:

According to an illustrative, non-limiting embodiment of the invention as defined in
~~claim 1~~, the wireless terminal for mobile unit starts the communications with the wireless base
station by operating the operating means and only an information output from the wireless
terminal for mobile unit to the wireless base station is allowed, so that the wireless base station
can sequentially grasp the present circumstances of the side of the wireless terminal for mobile
unit by the outputted information and therefore can take the subsequent measures properly and
speedily according to the circumstances.

AMENDMENTS TO THE CLAIMS

**This listing of claims will replace all prior versions and listings of claims in the
application:**

LISTING OF CLAIMS:

1. (original): A wireless terminal for mobile unit which is mounted in a mobile unit
and conducts communication with a wireless base station through wireless, said wireless
terminal comprising:

an operating section for starting the communication with the wireless base station; and

a controller for allowing only an information output from the wireless terminal to the
wireless base station in response to a fact that the operating section has been operated.
